Gary, is this meeting still happening? And if so, where/how do we connect?

Brandi,

Thanks; on the sampling plan status, the PRPs have asked for a meeting next week to discuss the scope of the work including the passive samplers & it may be helpful if someone from the dive team could be there. The meeting is planned for Wednesday 9/2/15 @ 1 – 3 pm. I'm working on getting a room now & will let you know. On the samplers, Dr. Reible @ Texas Tech promised to send them several weeks ago but I haven't got it yet so I'm tracking that down now & will let you know when it's in. The Oct 7-9 sampling timeframe may work, but don't know for sure yet - will know more after next week's meeting.

Thanks,

Gary Miller

Subject: Commitment to San Jacinto Waste Pits Dive Operation

Gary,

The EPA R6 and ERT Dive Officers would like to formally present our full commitment to performing sampling of the San Jacinto River Waste Pits and propose Oct 7-9, 2015 for consideration as sampling dates.

We determined that we have the appropriate equipment, personnel and experience necessary to assess cap integrity and determine migration of contaminant.

9672041

What is the status of the Work Plan/QAPP development and do you think it will fit into the October timeframe?

Do you have an update on the availability of sampling devices for our preparation purposes? We will be conducting a San Jacinto Prep dive in the next few weeks.

Respectfully,

Brandi Todd
